

Confidence, convenience and connection

More than just an automatic pill dispenser, Òmcare provides an entirely new level of care and independent living for seniors aging in place, and those with mental health or chronic conditions. Although Òmcare delivers care via interactive audio and video and cutting-edge technology—it was created with simplicity in mind.

Òmcare includes:

- The easy-to-use Òmcare Home Health Hub™ dispenses your personal medication at the right time.
- The Òmcare mobile app lets loved ones check in via video from anywhere—when it's time to take medication, or just for fun.

How it Works

STEP 1

The Òmcare app lets your caregiver know when it's time to check in

STEP 2

Answer the video call with one touch & talk for as long as you'd like

STEP 3

Your medication is dispensed in an easy-to-open pre-slit pouch

STEP 4

Your loved one can see that you're getting the right medication

Confidence, convenience and connection

Stay home and independent

Medication comes pre-packaged in the doses you need to take throughout the day. Using an Omcare pharmacy partner, your prescriptions are delivered right to your home. When it's time to take medication, you get a reminder video call and your caregiver confirms you've taken your meds.

Stay connected to the people who matter to you

Whether it's time to take medication, or time to share personal news—all it takes is the push of one button on Omcare to see and talk with your loved ones.

Stay safe and secure

Omcare keeps medication locked, and your family sets up permissions for who can access the medication and reporting. When you have questions or need help, Omcare customer care is ready to help at any time.
